## Frequently Asked Questions

### GENERAL CURRICULUM QUESTIONS

#### What comes with the curriculum?

The RISE curriculum includes 5 weeks (20 instructional days) of lessons with teacher guides for all math and literacy components, along with student lesson materials.

#### When will the RISE Summer School Portal be available?

In spring 2026, the designated points of contact for each site will receive access to the RISE Summer School Portal. From there, it is each leader's responsibility to roster their educators so that teachers can access all digital curriculum materials and other program resources. Additionally, the RISE Summer School Portal will house the 2026 Registration Form, where leaders will provide key programmatic information.

#### Who should I contact for questions about materials?

If you encounter issues accessing the portal or have questions about materials, please reach out to the Lavinia RISE Team at [summer.learning@laviniagroup.org](mailto:summer.learning@laviniagroup.org).

#### How will I access curriculum materials?

You have two options for accessing curriculum materials for the RISE Summer Program — digital access only (through the RISE Summer School Portal) or digital access with printed curriculum. Please see the [ordering and procurement guidance](#) on page 2 for additional details.

#### What standards are addressed in the curriculum?

RISE aligns to the Common Core State Standards and recognizes that states may present standards differently, even when addressing similar concepts. Using "crosswalks," the program translates Common Core-aligned content to each state's specific requirements (available on the RISE Summer School Portal). RISE prioritizes power standards, the most critical grade-level skills and concepts, and intentionally targets standards from the previous grade to bridge learning gaps. For example, students entering 5th grade engage with 4th-grade standards to reinforce foundational skills before tackling new content in the fall. This approach helps students build deeper mastery within the limited summer timeframe.
